JOURNAL OF STRUCTURAL GEOLOGY

VOLUME 21, 1999

LIST OF CONTENTS
AND AUTHOR INDEX

Chief Editor
J. P. EVANS *Utah State University*

Associate Editors
T. G. BLENKINSOP *University of Zimbabwe, Harare*
D. M. FISHER *Pennsylvania State University*
R. J. LISLE *University of Wales, Cardiff*
R. J. NORRIS *University of Otago*
C. W. PASSCHIER *University of Mainz*
J. C. WHITE *University of New Brunswick*

Editor Emeritus
S. H. TREAGUS *University of Manchester*

PERGAMON

Journal of Structural Geology

Chief Editor J. P. EVANS

Editorial Assistant A. HOCHBERG

Department of Geology, Utah State University, 4506 Old Main Hill, Logan, UT 84322-4506, U.S.A.
(Voice Phone: 435 797 3544; Fax: 435 797 1588; E-mail: jsg@cc.usu.edu)

Associate Editors

T. G. BLENKINSOP
Department of Geology, University of Zimbabwe, P.O. Box MP167, Mount Pleasant, Harare, Zimbabwe

D. M. FISHER
Department of Geosciences, Pennsylvania State University, University Park, PA 16802, U.S.A.

R. J. LISLE
Department of Earth Sciences, University of Wales, Cardiff CF1 3YE, U.K.

R. J. NORRIS
Department of Geology, University of Otago, Dunedin, New Zealand

C. W. PASSCHIER
Department of Geology, University of Mainz, 55099 Mainz, Germany

J. C. WHITE
Department of Geology, University of New Brunswick, Fredericton, NB, Canada, E3B 5A3

Editor Emeritus

S. H. TREAGUS
Department of Earth Sciences, University of Manchester, Manchester M13 9PL, U.K.

Editorial Advisory Board

Founding Editor, P. L. Hancock*, *Bristol, U.K.*

P. Bankwitz *Potsdam, Germany*	S. K. Ghosh *Calcutta, India*	W. D. Means *Albany, U.S.A.*	T. Shimamoto *Kyoto, Japan*
J. Behrmann *Freiburg, Germany*	L. Goodwin *Socorro, U.S.A.*	G. Mitra *Rochester, U.S.A.*	R. H. Sibson *Dunedin, New Zealand*
K. Birkenmajer *Krakow, Poland*	P. Hennings *Dallas, U.S.A.*	J. P. Platt *London, U.K.*	C. Simpson *Boston, U.S.A.*
J.-L. Bouchez *Toulouse, France*	B. E. Hobbs *Wembley, Australia*	B. van der Pluijm *Ann Arbor, U.S.A.*	H. Takagi *Tokyo, Japan*
J. Carreras *Barcelona, Spain*	P. J. Hudleston *Minneapolis, U.S.A.*	D. D. Pollard *Stanford, U.S.A.*	C. J. Talbot *Uppsala, Sweden*
P. R. Cobbold *Rennes, France*	J. A. Jackson *Cambridge, U.K.*	R. A. Price *Kingston, Canada*	J. Tullis *Providence, U.S.A.*
S. F. Cox *Canberra, Australia*	A. K. Khudoley *St Petersburg, Russia*	V. A. Ramos *Buenos Aires, Argentina*	E. Willemse *Rijswijk, The Netherlands*
G. A. Davis *Los Angeles, U.S.A.*	G. S. Lister *Melbourne, Australia*	J. G. Ramsay *Issirac, France*	P. F. Williams *Fredericton, Canada*
C. Doglioni *Rome, Italy*	Ma Xingyuan *Beijing, China*	D. J. Sanderson *London, U.K.*	S. F. Wojtal *Oberlin, U.S.A.*

Publishing and Advertising Offices

Published Monthly

Publication information: *Journal of Structural Geology* (ISSN 0191-8141). For 1999, volume 21 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (http://www.elsevier.nl/locate/strugeo). Further information is available on this journal and other Elsevier Science products through Elsevier's website: (http://www.elsevier.nl). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

© 1999 Elsevier Science Ltd. All rights reserved.

Periodicals postage is paid at Rahway, NJ. *Journal of Structural Geology* (ISSN 0191–8141) is published monthly in one volume by Elsevier Science Ltd., The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. The US subscription price is $936 per year.

Postmaster: send address corrections to *Journal of Structural Geology*, Elsevier Science, Customer Support Department, PO Box 945, New York, NY 10159-0945.

Distributed in the USA by Mercury Airfreight International, 365 Blair Road, Avenel, NJ 07001.

Cover illustration: D_1-fold in alternating carbonate-pelite beds of the Neoproterozoic Zerrissene turbidite system, Ugab River Valley, Namibia. The folds are asymmetric with parasitic folds in the steep limbs. A late fault transects the core of the structure. Photograph Cees Passchier, 1998.

CONTENTS OF VOLUME 21

NUMBER 1

iii Editorial

J. JACKSON and D. McKENZIE — 1 A hectare of fresh striations on the Arkitsa Fault, central Greece

N. FRY — 7 Striated faults: visual appreciation of their constraint on possible paleostress tensors

C. BASILE and J. P. BRUN — 23 Transtensional faulting patterns ranging from pull-apart basins to transform continental margins: an experimental investigation

M. L. CURTIS — 39 Structural and kinematic evolution of a Miocene to Recent sinistral restraining bend: the Montejunto massif, Portugal

S. FEINSTEIN, Y. EYAL and J. S. BELL — 55 Implications of meso-structures for deformational history of the Moose Mountain structure, Canadian Rocky Mountain foothills

A. P. MORRIS and D. A. FERRILL — 67 Constant-thickness deformation above curved normal faults

D. BAHAT, K. GROSSENBACHER and K. KARASAKI — 85 Mechanism of exfoliation joint formation in granitic rocks, Yosemite National Park

S. K. GHOSH and S. SENGUPTA — 97 Boudinage and composite boudinage in superposed deformations and syntectonic migmatization

A. S. YOSHINOBU and G. H. GIRTY — 111 Measuring host rock volume changes during magma emplacement

S. TAKIZAWA and Y. OGAWA — 117 Dilatant clayey microstructure in the Barbados décollement zone

B. GOSCOMBE and R. TROUW — 123 The geometry of folded tectonic shear sense indicators

N. FRY — 129 Fry plots: warning about summed moments

135 Book Review

NUMBER 2

S. H. TREAGUS, P. F. WILLIAMS and W. M. DUNNE — 137 In Memoriam: Paul Lewis Hancock

S. E. JOHNSON — 139 Back-rotation during crenulation cleavage development: implications for structural facing and cleavage-forming processes

B. DEN BROK, M. ZAHID and C. W. PASSCHIER — 147 Stress induced grain boundary migration in very soluble brittle salt

T. W. ARGLES and J. P. PLATT 153 Stepped fibres in sillimanite-bearing veins: valid shear-sense indicators in high grade rocks?

N. S. MANCKTELOW 161 Finite-element modelling of single-layer folding in elasto-viscous materials: the effect of initial perturbation geometry

H. STEL 179 Evolution of ptygmatic folds in migmatites from the type area (S. Finland)

D. R. GRAY, C. JANSSEN and Y. VAPNIK 191 Deformation character and palaeo-fluid flow across a wrench fault within a Palaeozoic subduction–accretion system: Waratah Fault Zone, southeastern Australia

D. G. COOK and B. C. MACLEAN 215 The Imperial anticline, a fault-bend above a bedding-parallel thrust ramp, Northwest Territories, Canada

C. L. ANDRONICOS, L. S. HOLLISTER, C. DAVIDSON and D. CHARDON 229 Kinematics and tectonic significance of transpressive structures within the Coast Plutonic Complex, British Columbia

235 Book Reviews

NUMBER 3

C. A. J. WIBBERLEY, J.-P. PETIT and T. RIVES 251 Mechanics of high displacement gradient faulting prior to lithification

L. MAERTEN, E. J. M. WILLEMSE, D. D. POLLARD and K. RAWNSLEY 259 Slip distributions on intersecting normal faults

P. N. MOLLEMA and M. ANTONELLINI 273 Development of strike-slip faults in the dolomites of the Sella Group, Northern Italy

D. BAHAT 293 Single-layer burial joints vs single-layer uplift joints in Eocene chalk from the Beer Sheva syncline in Israel

A. TSUTSUMI 305 Size distribution of clasts in experimentally produced pseudotachylytes

M. W. NYMAN 313 Fabric reactivation: an example from the Hualapai Mountains, NW Arizona, USA

P. D. BONS and M. W. JESSELL 323 Micro-shear zones in experimentally deformed octachloropropane

K. J. W. McCAFFREY, C. F. MILLER, K. E. KARLSTROM and C. SIMPSON 335 Synmagmatic deformation patterns in the Old Woman Mountains, SE California

B. STÖCKHERT, M. R. BRIX, R. KLEINSCHRODT, A. J. HURFORD and R. WIRTH 351 Thermochronometry and microstructures of quartz—a comparison with experimental flow laws and predictions on the temperature of the brittle–plastic transition

371 Referees for Volume 20

NUMBER 4

H. A. KOYI and A. TEIXELL — 373 Where is the footwall flat? A cautionary note on template constraints

R. WEINBERGER — 379 Initiation and growth of cracks during desiccation of stratified muddy sediments

J. V. SMITH — 387 Inter-array and intra-array kinematics of en échelon sigmoidal veins in cross-bedded sandstone, Merimbula, southeastern Australia

T. FLÖTTMANN and M. HAND — 399 Folded basement-cored tectonic wedges along the northern edge of the Amadeus Basin, Central Australia: evaluation of orogenic shortening

F. ROSSETTI, G. RANALLI and C. FACCENNA — 413 Rheological properties of paraffin as an analogue material for viscous crustal deformation

T. T. CLADOUHOS — 419 Shape preferred orientations of survivor grains in fault gouge

T. T. CLADOUHOS — 437 A kinematic model for deformation within brittle shear zones

J. INGLES, C. DAUCH, J.-C. SOULA, P. VIALLARD and S. BRUSSET — 449 Application of the Prandtl–Nadai cell model to a regional scale fault intersection: the Grésigne–Quercy block (SW France)

T. MASUDA, Y. KUGIMIYA, I. AOSHIMA, Y. HARA and H. IKEI — 467 A statistical approach to determination of a mineral lineation

NUMBER 5

A. LIN — 473 Roundness of clasts in pseudotachylytes and cataclastic rocks as an indicator of frictional melting

C. K. MORLEY — 479 Marked along-strike variations in dip of normal faults—the Lokichar fault, N. Kenya rift: a possible cause for metamorphic core complexes

P. G. KELLY, D. C. P. PEACOCK, D. J. SANDERSON and A. C. McGURK — 493 Selective reverse-reactivation of normal faults, and deformation around reverse-reactivated faults in the Mesozoic of the Somerset coast

J. CHOROWICZ, D. DHONT and N. GÜNDOĞDU — 511 Neotectonics in the eastern North Anatolian fault region (Turkey) advocates crustal extension: mapping from SAR ERS imagery and Digital Elevation Model

D. SIMS, D. A. FERRILL and J. A. STAMATAKOS — 533 Role of a ductile décollement in the development of pull-apart basins: Experimental results and natural examples

J. INGLES, C. LAMOUROUX, J.-C. SOULA, N. GUERRERO and P. DEBAT — 555 Nucleation of ductile shear zones in a granodiorite under greenschist facies conditions, Néouvielle massif, Pyrenees, France

NUMBER 6

D. JIANG and P. F. WILLIAMS	577	When do dragfolds not develop into sheath folds in shear zones?
S. J. MARTEL	585	Mechanical controls on fault geometry
M. NEMCOK, D. KOVÁC and R. J. LISLE	597	A stress inversion procedure for polyphase calcite twin and fault/slip data sets
M. P. FISCHER and P. B. JACKSON	613	Stratigraphic controls on deformation patterns in fault-related folds: a detachment fold example from the Sierra Madre Oriental, northeast Mexico
N. C. MOREWOOD and G. P. ROBERTS	635	Lateral propagation of the surface trace of the South Alkyonides normal fault segment, central Greece: its impact on models of fault growth and displacement–length relationships
G. GUTIÉRREZ-ALONSO and M. R. GROSS	653	Structures and mechanisms associated with development of a fold in the Cantabrian Zone thrust belt, NW Spain
J.-E. MARTELAT, K. SCHULMANN, J.-M. LARDEAUX, C. NICOLLET and H. CARDON	671	Granulite microfabrics and deformation mechanisms in southern Madagascar
F. STORTI and F. SALVINI	689	Kinematics of large scale tip line folds from the High Atlas thrust belt, Morocco: Discussion
B. SAINT BEZAR, D. FRIZON DE LAMOTTE, J. L. MOREL and E. MERCIER	691	Kinematics of large scale tip line folds from the High Atlas thrust belt, Morocco: Reply
	I	International Newsletter 18: June, 1999

NUMBER 7

	iii	Special Issue Announcement
S. HARDY and K. McCLAY	695	Kinematic modelling of extensional fault-propagation folding
A. BECKER and M. R. GROSS	703	Sigmoidal wall-rock fragments: application to the origin, geometry and kinematics of en échelon vein arrays
M. A. MAMTANI, R. V. KARANTH and R. O. GREILING	711	Are crenulation cleavage zones mylonites on the microscale?
A. TRIPATHI and V. K. GAIROLA	719	Fold symmetry—a quantitative description
F. BASTIDA, J. ALLER and N. C. BOBILLO-ARES	729	Geometrical analysis of folded surfaces using simple functions
B. GRASEMANN and J.-C. VANNAY	743	Flow controlled inverted metamorphism in shear zones
H. D. GIBSON, R. L. BROWN and R. R. PARRISH	751	Deformation-induced inverted metamorphic field gradients: an example from the southeastern Canadian Cordillera

M. G. MILLER 769 Active breaching of a geometric segment boundary in the Sawatch Range normal fault, Colorado, USA

G. MANATSCHAL 777 Fluid- and reaction-assisted low-angle normal faulting: evidence from rift-related brittle fault rocks in the Alps (Err Nappe, eastern Switzerland)

S. ZHANG, T. E. TULLIS and V. J. SCRUGGS 795 Permeability anisotropy and pressure dependency of permeability in experimentally sheared gouge materials

J. CASTRO and K. V. CASHMAN 807 Constraints on rheology of obsidian lavas based on mesoscopic folds

S. BERGBAUER and S. J. MARTEL 821 Formation of joints in cooling plutons

B. GRASEMANN, H. FRITZ and J.-C. VANNAY 837 Quantitative kinematic flow analysis from the Main Central Thrust Zone (NW-Himalaya, India): implications for a decelerating strain path and the extrusion of orogenic wedges

K. J. SMART, R. D. KRIEG and W. M. DUNNE 855 Deformation behavior during blind thrust translation as a function of fault strength

J. M. GONZÁLEZ-CASADO and C. GARCÍA-CUEVAS 875 Calcite twins from microveins as indicators of deformation history

NUMBERS 8–9

20th Anniversary Special Issue: Questions in Structural Geology

891 Editorial

893 Preface

S. H. TREAGUS 895 Are viscosity ratios of rocks measurable from cleavage refraction?

P. L. HANCOCK, R. M. L. CHALMERS, E. ALTUNEL and Z. ÇAKIR 903 Travitonics: using travertines in active fault studies

W. D. MEANS 917 Reversed structures and bounce structures: are they recognizable? Are they real?

P. HUDLESTON 923 Strain compatibility and shear zones: is there a problem?

D. JIANG and P. F. WILLIAMS 933 A fundamental problem with the kinematic interpretation of geological structures

J. WATTERSON 939 The future of failure: stress or strain?

C. J. TALBOT 949 Can field data constrain rock viscosities?

B. TIKOFF and S. F. WOJTAL 959 Displacement control of geologic structures

C. TEYSSIER and B. TIKOFF 969 Fabric stability in oblique convergence and divergence

J. HIPPERTT	975	Are *S–C* structures, duplexes and conjugate shear zones different manifestations of the same scale-invariant phenomenon?
R. A. SCHULTZ	985	Understanding the process of faulting: selected challenges and opportunities at the edge of the 21st century
D. S. COWAN	995	Do faults preserve a record of seismic slip? A field geologist's opinion
J. JACKSON	1003	Fault death: a perspective from actively deforming regions
E. TAVARNELLI	1011	Normal faults in thrust sheets: pre-orogenic extension, post-orogenic extension, or both?
J. J. WALSH, J. WATTERSON, W. R. BAILEY and C. CHILDS	1019	Fault relays, bends and branch-lines
D. A. FERRILL, J. A. STAMATAKOS and D. SIMS	1027	Normal fault corrugation: implications for growth and seismicity of active normal faults
P. VROLIJK and B. A. VAN DER PLUIJM	1039	Clay gouge
T. ENGELDER	1049	Transitional–tensile fracture propagation: a status report
R. MARRETT and D. C. P. PEACOCK	1057	Strain and stress
Á. F. NIETO-SAMANIEGO	1065	Stress, strain and fault patterns
R. C. FLETCHER and D. D. POLLARD	1071	Can we understand structural and tectonic processes and their products without appeal to a complete mechanics?
D. HINDLE and M. BURKHARD	1089	Strain, displacement and rotation associated with the formation of curvature in fold belts; the example of the Jura arc
S. T. JOHNSTON	1103	Large-scale coast-parallel displacements in the Cordillera: a granitic resolution to a paleomagnetic dilemma
B. TIKOFF, M. DE SAINT BLANQUAT and C. TEYSSIER	1109	Translation and the resolution of the pluton space problem
M. J. MARKLEY, C. TEYSSIER and R. CABY	1119	Re-examining Argand's view of the Siviez–Mischabel nappe
J.-L. VIGNERESSE	1125	Should felsic magmas be considered as tectonic objects, just like faults or folds?
S. R. PATERSON and K. L. SCHMIDT	1131	Is there a close spatial relationship between faults and plutons?
C. FERNÁNDEZ and A. CASTRO	1143	Pluton accommodation at high strain rates in the upper continental crust. The example of the Central Extremadura batholith, Spain
M. B. GRAY and G. MITRA	1151	Ramifications of four-dimensional progressive deformation in contractional mountain belts

R. B. MILLER and S. R. PATERSON 1161 In defense of magmatic diapirs

S. MARSHAK 1175 Deformation style way back when: thoughts on the contrasts between Archean/Paleoproterozoic and contemporary orogens

S. E. JOHNSON 1183 Near-orthogonal foliation development in orogens: meaningless complexity, or reflection of fundamental dynamic processes?

J.-P. GRATIER, F. RENARD and P. LABAUME 1189 How pressure solution creep and fracturing processes interact in the upper crust to make it behave in both a brittle and viscous manner

J.-P. PETIT, C. A. J. WIBBERLEY and G. RUIZ 1199 'Crack–seal', slip: a new fault valve mechanism?

N. B. WOODWARD 1209 Competitive macroscopic deformation processes

C. WIBBERLEY 1219 Are feldspar-to-mica reactions necessarily reaction-softening processes in fault zones?

A.-M. BOULLIER 1229 Fluid inclusions: tectonic indicators

M. LESPINASSE 1237 Are fluid inclusion planes useful in structural geology?

G. J. POTTS and S. M. REDDY 1245 Construction and systematic assessment of relative deformation histories

S. M. REDDY and G. J. POTTS 1255 Constraining absolute deformation ages: the relationship between deformation mechanisms and isotope systematics

C. K. MORLEY 1267 How successful are analogue models in addressing the influence of pre-existing fabrics on rift structure?

I Special Issue Announcement

NUMBER 10

i Special Issue Announcement: The Paul Hancock Memorial Issue

v Special Issue Announcement: Texture and Physical Properties of Rocks

A. F. GLAZNER, J. M. BARTLEY and B. S. CARL 1275 Oblique opening and noncoaxial emplacement of the Jurassic Independence dike swarm, California

A. BAYASGALAN, J. JACKSON, J.-F. RITZ and S. CARRETIER 1285 'Forebergs', flower structures, and the development of large intra-continental strike-slip faults: the Gurvan Bogd fault system in Mongolia

S. E. TINDALL and G. H. DAVIS 1303 Monocline development by oblique-slip fault-propagation folding: the East Kaibab monocline, Colorado Plateau, Utah

D. G. A. M. AERDEN and J. MALAVIEILLE 1321 Origin of a large-scale fold nappe in the Montagne Noire, Variscan belt, France

G. I. ALSOP and R. E. HOLDSWORTH 1335 Vergence and facing patterns in large-scale sheath folds

Ø. STEEN and A. ANDRESEN 1351 Effects of lithology on geometry and scaling of small faults in Triassic sandstones, East Greenland

S. P. NEVES and G. MARIANO 1369 Assessing the tectonic significance of a large-scale transcurrent shear zone system: the Pernambuco lineament, northeastern Brazil

K. A. KLEPEIS, N. R. DACZKO and G. L. CLARKE 1385 Kinematic vorticity and tectonic significance of superposed mylonites in a major lower crustal shear zone, northern Fiordland, New Zealand

Y.-C. CHAN and J. M. CRESPI 1407 Albite porphyroblasts with sigmoidal inclusion trails and their kinematic implications: an example from the Taconic Allochthon, west-central Vermont

M. YENES, F. ÁLVAREZ and G. GUTIÉRREZ-ALONSO 1419 Granite emplacement in orogenic compressional conditions: the La Alberca–Béjar granitic area (Spanish Central System, Variscan Iberian Belt)

D. SHELLEY and G. BOSSIÈRE 1441 Ile de Groix: retrogression and structural developments in an extensional régime

J. A. CLAUSEN, R. H. GABRIELSEN, P. A. REKSNES and E. NYSÆTHER 1457 Development of intraformational (Oligocene–Miocene) faults in the northern North Sea: influence of remote stresses and doming of Fennoscandia

B. STÖCKHERT and J. DUYSTER 1477 Discontinuous grain growth in recrystallised vein quartz — implications for grain boundary structure, grain boundary mobility, crystallographic preferred orientation, and stress history

D. H. W. HUTTON 1491 Timing and nature of magmatic fabrics from structural relations around stoped blocks: Discussion

K. T. FOWLER JR and S. R. PATERSON 1493 Timing and nature of magmatic fabrics from structural relations around stoped blocks: Reply

1495 Book Review

NUMBER 11

B. TIKOFF and H. FOSSEN 1497 Three-dimensional reference deformations and strain facies

J. WILSON and J. GROCOTT 1513 The emplacement of the granitic Las Tazas complex, northern Chile: the relationship between local and regional strain

K. KOSAKA, M. SHIMIZU and S. TAKIZAWA 1525 Delineation of deformation grades of low-strain granitoids using assemblages of elementary deformation textures

C. J. TALBOT 1535 Ductile shear zones as counterflow boundaries in pseudoplastic fluids

E. C. BEAM and D. M. FISHER 1553 An estimate of kinematic vorticity from rotated elongate porphyroblasts

M. AOYA and S. R. WALLIS 1561 Structural and microstructural constraints on the mechanism of eclogite formation in the Sambagawa belt, SW Japan

U. RING, S. LAWS and M. BERNET 1575 Structural analysis of a complex nappe sequence and late-orogenic basins from the Aegean Island of Samos, Greece

J. HIPPERTT and E. TOHVER 1603 On the development of zones of reverse shearing in mylonitic rocks

P. GAILLOT, J. DARROZES and J.-L. BOUCHEZ 1615 Wavelet transform: a future of rock fabric analysis?

J. M. VERMILYE and C. H. SCHOLZ 1623 Fault propagation and segmentation: insight from the microstructural examination of a small fault

D. T. McCONAUGHY and T. ENGELDER 1637 Joint interaction with embedded concretions: joint loading configurations inferred from propagation paths

M. MAMTANI, R. V. KARANTH and R. O. GREILING 1653 Erratum: Are crenulation cleavage zones mylonites on the microscale?

NUMBER 12

P. VANNUCCHI 1655 Segmented, curved faults: the example of the Balduini Thrust Zone, Northern Apennines, Italy

A. LAVENU and J. CEMBRANO 1669 Compressional- and transpressional-stress pattern for Pliocene and Quaternary brittle deformation in fore arc and intra-arc zones (Andes of Central and Southern Chile)

D. CUREWITZ and J. A. KARSON 1693 Ultracataclasis, sintering, and frictional melting in pseudotachylytes from East Greenland

S. K. GHOSH, S. HAZRA and S. SENGUPTA 1715 Planar, non-planar and refolded sheath folds in the Phulad Shear Zone, Rajasthan, India

F. SALVINI, A. BILLI and D. U. WISE 1731 Strike-slip fault-propagation cleavage in carbonate rocks: the Mattinata Fault Zone, Southern Apennines, Italy

M. EGYDIO-SILVA and D. MAINPRICE 1751 Determination of stress directions from plagioclase fabrics in high grade deformed rocks (Além Paraíba shear zone, Ribeira fold belt, southeastern Brazil)

T. M. KUSKY and D. C. BRADLEY 1773 Kinematic analysis of mélange fabrics: examples and applications from the McHugh Complex, Kenai Peninsula, Alaska
